

How to avoid going back to the Splash Screen Activity on the press of Back Button?

To prevent the user from going back to the splash screen on pressing the 'back' button, just add the following line to the splash screen activity, in your AndroidManifest.xml:

```
android:noHistory="true"
```

This attribute will prevent the splash screen from going to the stack, and thus it won't be displayed at the press of the 'back' button.

You could also do this programmatically, by calling `finish();` after calling `startActivity` to start the MainActivity. Example:

```
public void onClick(View v) {  
    Intent intent = new Intent(Main.this, Splash.class);  
    startActivity(intent);  
    finish();  
}
```
