

You might need to hide the status bar(formerly known as the notification bar) for some activities like your splash screen activity, etc.

This is very easy to do.

Just adding the following code to the onCreate method of the activity for which you want to hide the status bar:

```
// Hide the status bar.  
View decorView = getWindow().getDecorView();  
int uiOptions = View.SYSTEM_UI_FLAG_FULLSCREEN;  
decorView.setSystemUiVisibility(uiOptions);
```

Manas Sharma

I'm a physicist specializing in computational material science with a PhD in Physics from Friedrich-Schiller University Jena, Germany. I write efficient codes for simulating light-matter interactions at atomic scales. I like to develop Physics, DFT, and Machine Learning related apps and software from time to time. Can code in most of the popular languages. I like to share my knowledge in Physics and applications using this Blog and a YouTube channel.
