I recently parsed the *Wikimedia* for the *electronic shell diagrams* of the elements of the periodic table, for an app that I was working on.

Here I am sharing the links to the image files:

****NOTE: These files are licensed under the Creative Commons Attribution-Share Alike 2.0 UK: England & Wales license. ****

So you will need to attribute the author and share it under the similar license.

6: Carbon **2,4**

Manas Sharma

I’m a physicist specializing in computational material science with a PhD in Physics from Friedrich-Schiller University Jena, Germany. I write efficient codes for simulating light-matter interactions at atomic scales. I like to develop Physics, DFT, and Machine Learning related apps and software from time to time. Can code in most of the popular languages. I like to share my knowledge in Physics and applications using this Blog and a YouTube channel.
